WORK EXPERIENCE

Software Engineer

July 2022 – Present

CloudScale Systems — San Francisco, CA

- Developed customer-facing analytics dashboards using Next.js, React, and TypeScript serving 120,000 monthly active users.
- Reduced initial page load times by 42% through image optimization, dynamic imports, and Next.js server components.
- Built RESTful microservices in Node.js and Express with PostgreSQL and Prisma, handling over 2.5 million daily requests.
- Integrated Redis caching layer, decreasing database query latency by 60%.
- Configured GitHub Actions CI/CD pipeline, reducing manual release cycle time from 4 hours to 15 minutes.

Junior Full-Stack Developer

June 2020 – June 2022

DevSphere Studios — Austin, TX

- Built responsive client web portals using React, Redux, and Node.js microservices.
- Implemented automated unit and integration tests using Jest and Supertest, raising test coverage to 85%.
- Maintained PostgreSQL database migrations and optimized slow queries.
- Containerized development environments using Docker and Docker Compose.

KEY PROJECTS

TradePulse — Real-Time Portfolio Tracker

Next.js, TypeScript, WebSockets, AWS ECS, CloudFront

- Built a portfolio tracking web app with Next.js, TypeScript, and WebSockets for real-time price feeds.
- Deployed on AWS ECS with automated SSL and CloudFront CDN distribution.
